Assembly Instructions:

Follow the simple steps shown in the pictures.
Tool needed: 5/16" Nut Driver or pliers, 1/4" wrench.

1. Put screws through Open Frame control in the locations shown.
2. Orient the DIN adapter bracket so the clip spring is toward the bottom of the control.
3. Put the adapter bracket onto the screws. Install lock washers and nuts.
4. Tighten the fasteners.

5. Install onto DIN rail: Two nuts were installed in the previous steps. To install the bracket onto the DIN rail, touch the nuts on the spring side of the bracket to the inside edge of the DIN rail as shown below. Then slide the bracket into place.
